

Mapping Health Profession Education Researches

- Tue Jul 19 15:33:29 KST 2022
 - Bibliometrics
 - Chae, Kwan ...
-

Note

Motivation

- Bibliometrics approach without a specific research frame is meaningless
- If we can successfully show the identification and boundary of HPE from a conceptual literature review, the following questions would be beneficial to the bibliometrics approach
- Comparison disciplinary between research in HPE and HRD (or specific area of HRD, i.e., learning and development)
 - What is the similarity and what is the difference between the two discipline
 - Are they enough to have disciplinary for comparison?
 - What mature level are those two disciplines' area
 - exploring knowledge expansion by identifying similarities and difference
 - What different or similar(standard) academic root and path between two types of research

Advantage

- Providing map-like information and knowledge for researchers and practitioners
- Bibliometrics approaches allow researchers to compare two different disciplines
- Diverse level of comparison
 - research front (co-citation)
 - research backend (biblio-coupling)
 - keyword level (keyword network)
 - topic model (timely evolved trend)

Shortage (struggle)

- Without specific boundaries and theoretical reasoning, useless
-

Introduction

-

Problem

-

Question (master question)

-

Purpose

-

Objectives (research questions)

Comment and Questions
